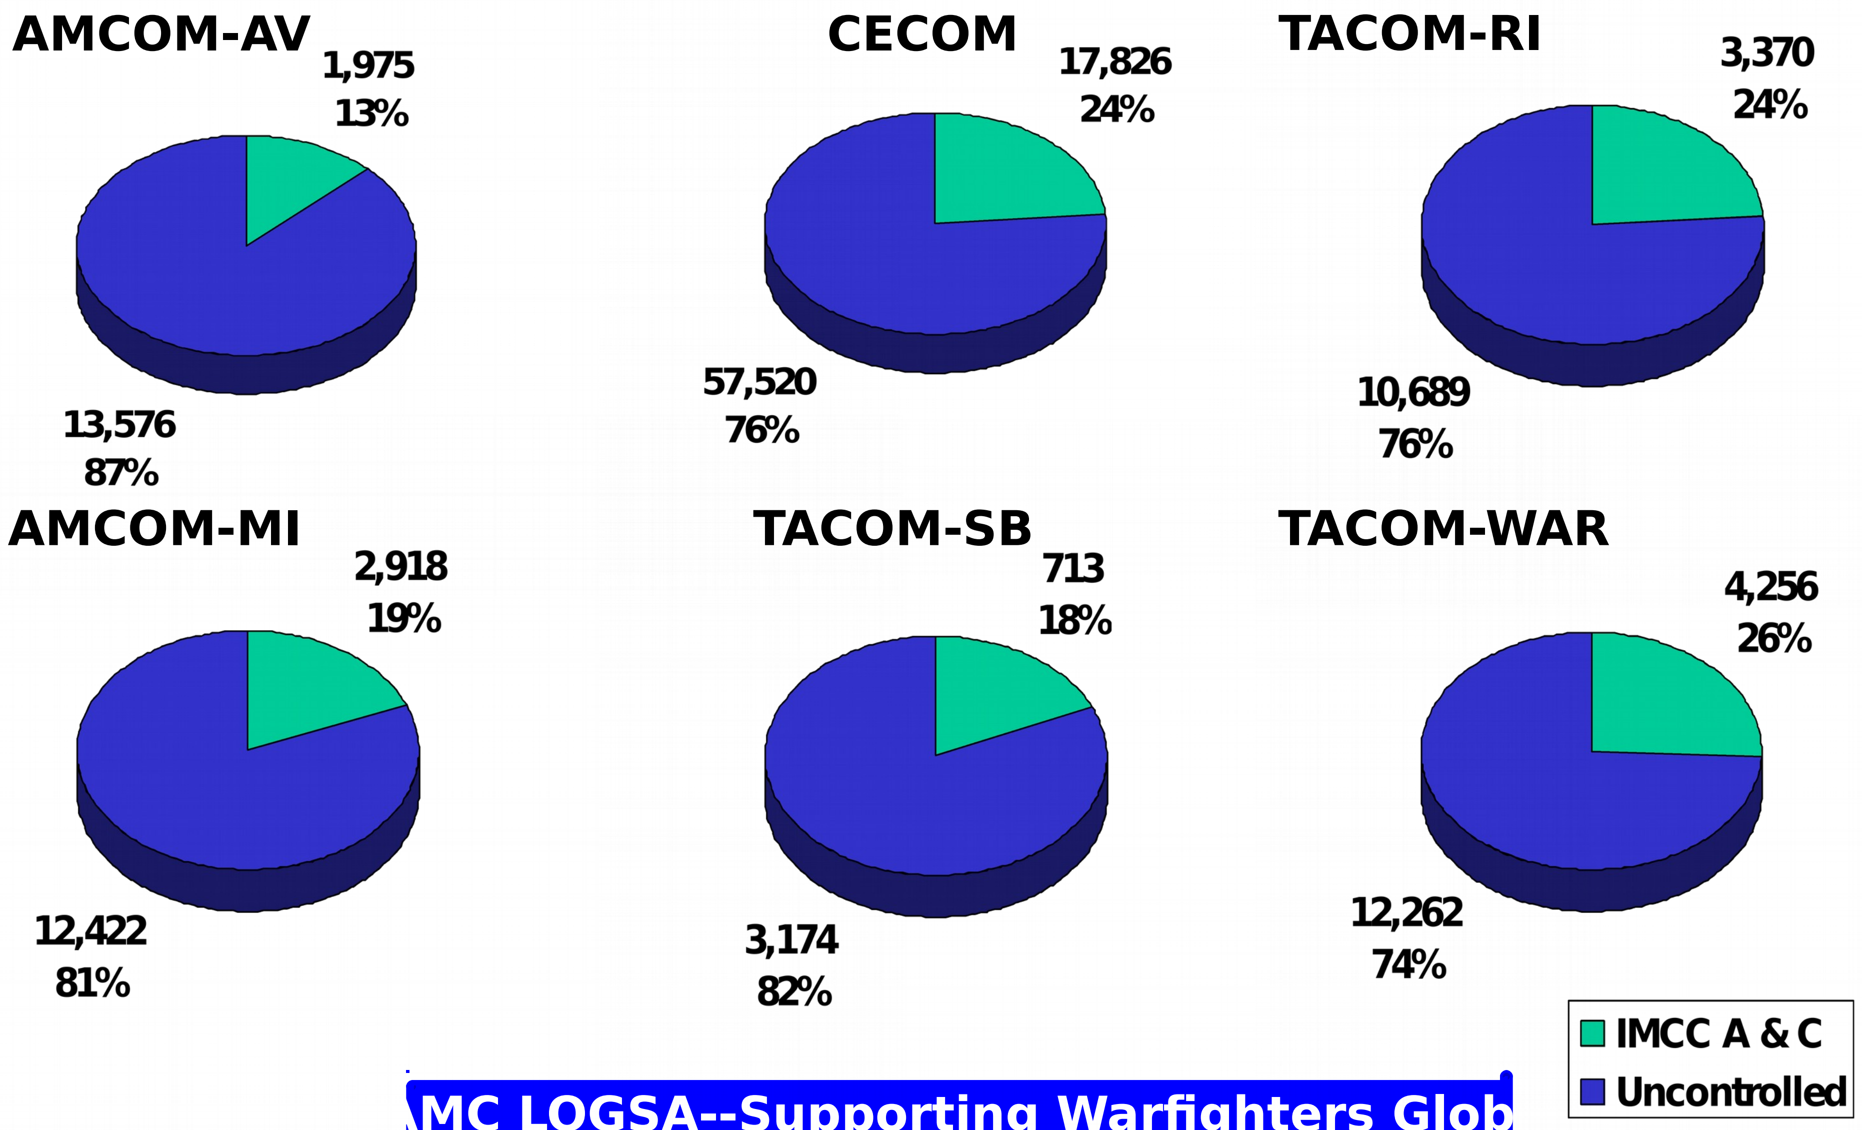
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – DEC 06



Dec 06 data as of 18 Jan 06

Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,020	955
AMCOM-M	631	2,287
CECOM	17,546	280
TACOM-W	613	3,643
TACOM-R	1,482	1,888
TACOM-SB	580	133

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
